

## NexBeta

### APPLICATION:

- Vulnerable Populations – hospitals, government buildings, schools, etc.
- Measures Alpha, Beta, Gamma.
- Continuous Real-time, In-line or Portable.
- Measures at or below 2009 EPA Protective Action Guidelines (PAG) and Military Drinking guidelines.
- Simple installation.

## MiniTect SC

### All-in-one System CBRN Monitoring

- Solar Powered Portable.
- Suitcase (SC) or Backpack (MiniTect BP).
- 7 Chemicals Detected.
- Multiple Biological Contaminants Detected.
- 4-10 Radionuclides Detectors.

## Eliminate

- Toxic disposal issues.
- Lag time between sampling and testing.
- Lab costs.

## Reduce

- Field labor costs.
- Risk to water infrastructure.
- Risk to public safety.

**CHEMIST- IN-A-BOX®**  
The only system available with continuous alpha/beta, tritium, and radon monitoring. Also available as UNITECT with Chemical / Biological Detectors

## NexGen-SSS

### APPLICATION:

- Water and waste water utilities, nuclear power and desalination plants.

### FEATURES:

- Measures at or below 2009 EPA Protective Action Guidelines (PAG) and Military Drinking guidelines.
- Continuous real-time data acquisition, archive, and retrieval.
- Easy integration into infrastructure and mainframe.
- Models available for seawater.

## PEMO-7

### PEMO-7 PIPE MONITOR

Detection and quick alarm of waterborne radioactivity contamination flowing through one or more pipes, ducts or effluent streams regardless of flow rate.

## SSS-22P

### Liquid Scintillation Portable Counting System

- All BETA emitters
- Includes: Carbon-14, Tritium, SR-90, CS-137
- Field testing kit
